DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-5 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 12, 13, and 16 of U.S. Patent No. 6,245,227 (Moon et al). Although the conflicting claims are not identical, they are not patentably distinct from each other because all limitations being claim herein by applicant are disclosed in the above listed claims. For example; applicants' claim 1 is disclosed in patent '227 claim 1, applicants' claim 2 is disclosed in patent '227 claims 1 and 13, applicants' claims 3 and 4 are disclosed in patent '227

claims 1 and 16, and applicants' claim 5 is disclosed in patent '227 claim 12. The subject matter being claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patents; 6,563,111 (Moon et al), 6,454,938 (Moon et al), 6,569,324 (Moon et al). All of the cited US patents contain art similar to that being claimed by applicant, more specifically, micro fabricated electrospray methods and apparatuses.
